

» FUNCTIONALITY

KEY FOB AS AN EXTENSION OF YOUR OEM APP

VEHICLE PAIRING KEPT SIMPLE

» WHY OFFER A KEY FOB THAT EXTENDS YOUR OEM APP?

Infinite range!

The drc Smart Climate Control is the range-independent alternative to the smartphone app!

Keep it simple! An easy, fast and haptic product that your customers are used to.

- No need to unlock cell phone and searching for app/open ...
- No problem if the smartphone is damaged/forgotten or discharged!

Enhance the brand loyalty of your customers:

Key fobs with OEM logo are still gladly shown, used and perceived as a status symbol!

70% of your customers still prefer using a key fob to control vehicle functions.¹

¹ Resource: Market potential study drc Smart Key; Hagstotz ITM 11/2020; www.hagstotz-itm.de; Awareness of apps for remote control of vehicle functions: Question 12: "Do you know of ways to control individual functions of a vehicle via smartphone apps or to call up vehicle information?", Question 13: "From which provider is the app you use?". Proportion of those, across all age groups, stating, "Yes, I know and use myself." 30%. Particularly the age group up to 34 is familiar with and uses smartphone apps to control functions of their own vehicles. Awareness and use decline steadily with increasing age.

The **range-independent** remote control solution for controlling vehicle components – with **integrated mobile radio technology**.

» YOUR ADVANTAGES
